

## **ILLINOIS WATER ENVIRONMENT ASSOCIATION 10-Day Water Environment Curriculum Grant Application**

### What is the 10-Day Water Environment Curriculum ?

The Ten Day Water Environment Curriculum, WEC, is curriculum designed to teach students about environmental issues and our water environment. The target audience is grades 6 – 9. The WEC was developed by the Illinois Water Environment Association, a group of Illinois Professionals working together to enhance and protect our state's water environment.

The WEC includes lesson plan guides which provide teachers with detailed technical information, diagrams, definitions, and reference materials. The guides are supplemented by a DVD containing 10 – 15 minute segments associated with each daily topic. There are suggested lesson plans for each day of the two week unit. Lesson plans include information on lecture topics, a choice of hands on lab activities, and possible homework assignments.

Detailed information on the WEC can be found at [www.iweasite.org](http://www.iweasite.org)

IWEA sells copies of the WEC for \$150.00. This grant will cover the full price. IWEA funds ten grants each year.

Please mail completed grant application form to:

IWEA  
PO Box 337  
West Chicago, IL 60186-0337
